

The United States remains the largest donor to the global HIV response, investing resources provided through the generosity of the American people with accountability, transparency, efficiency, and effectiveness.

Saving Lives through Leadership and Partnerships

HIV/AIDS

Acquired Immune Deficiency Syndrome

First Recognized
1981

36.9 MILLION
INFECTED WITH **HIV/AIDS**
(2017)

An estimated 1.8 million individuals worldwide became newly infected with HIV in 2017 – about 5,000 new infections per day.

1.8 MILLION
CHILDREN

worldwide are living with HIV. Most of these children were infected by their HIV-positive mothers during pregnancy, or childbirth or breastfeeding.

Girls account for 75% of new infections among adolescents in sub-Saharan Africa.

“No greater action is needed right now than empowering girls & women to protect their health, well-being & pursue their dreams.” - Amb. Bix
